Committee: House Committee On Agriculture, Land Use, Natural
Resources, and Water

Measure, Appointment or Topic: HB3587

Oregon's underwater eelgrass meadows are biodiversity hotspots, carbon sinks, and nursery habitat to many juvenile fish species. Their health is vital for sustaining our fisheries, maintaining water quality, and buffering against climate impacts. However, there are signs these essential habitats are in decline in Oregon. HB 3580 would set up a Taskforce to set conservation targets through a collaborative effort involving agencies, Tribes, scientists, local communities, and others. This bill is the first essential step to proactively prevent habitat loss before it's too late.
