

Submitter: Kim D

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB215

A bill proposing to threaten all of us with nuclear waste without proven safe storage is a bill proposing Oregon's inhabitants and places be jeopardized indefinitely for the sole purpose of supporting the profits of corporations. Nuclear energy cannot be considered a reasonable alternative until all elements of safety can be achieved, including storage of all waste. Don't gamble with our grandchildren's futures. Please reject this bill.
