

Submitter: Kim D

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB216

I am strongly opposed to his bill. Risking all of us with nuclear accidents and unsafe or inadequate nuclear waste is a foolhardy proposal. Don't make it easier to destroy what's left. There can be no reasonable justifications for gambling with our and future generations' health and well being.

Please do NOT support this bill.
