

Submitter: Kim D

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB635

Please oppose this bill. We do not need to support a poorly designed research project with motivation for certain conclusions. We all know we do not have a safe storage solution for nuclear waste. Honest research into this problem would be a much more meaningful study. This bill's obvious aim is to support an industry that is strongly opposed by Oregon citizens. Please vote no.
