

Submitter: Pam Neild

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3081

I support this bill because efficiency measures are the least cost, easiest way to combat climate change and improve quality of life. I spent the time and money to install EE measures into my own home and have benefitted from them for years both financially and in comfort. It took a lot of time and patience to find the incentives. Most people won't do this. This bill will help.
