

Submitter: Melinda Adams

On Behalf Of:

Committee: Senate Committee On Early Childhood and Behavioral Health

Measure, Appointment or Topic: SB702

Flavored nicotine products are helpful to those moving on from cigarettes to safer alternatives like flavored nicotine gum or pouches, and have been shown to have a positive effect on smoking cessation as opposed to unflavored. Considering most retailers already require a universal ID check and scan for purchasing tobacco, it seems like this bill is only targeting adults who are legally able to, and have the right to, purchase these products.
