

Submitter: David Klaus

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB215

Nuclear power is the cleanest and most effective form of energy there is next to the sun. There's absolutely no valid reason to hold up building permits until a site for radioactive waste is approved. Our state needs nuclear power in order to meet the growing needs of consumers and for the electrification for EVs. We also need to drive down the wholesale cost of electricity to help reduce inflation.
