

Submitter: Amanda Duncan

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3081

As a long-time Oregonian concerned about the health and resiliency of our communities, I am writing to urge you to support HB 3081. Electrification and energy efficiency improvements can lead to less pollution, better health, and lower costs, but most Oregonians need some financial assistance to make these upgrades. However, finding out what financial assistance is available to them is difficult right now. HB 3081's "One Stop Shop 2.0" will provide much-needed improvements to the current tool, turning the passive online resource into an active navigator that will help people with the applications, the connections to trusted contractors, and the questions that will invariably come up during the upgrade process. I am highly motivated to make these upgrades to my own residence and began looking into what it would take to do so, but found the process very daunting. I know it must be even more daunting for people with small kids, multiple jobs, language barriers, etc. HB 3081 will lower the barriers to help all of us make upgrades our homes that will improve the resiliency of our communities.

Please support HB 3081.

Sincerely,

Amanda Duncan  
Beaverton, Oregon
