Committee: Senate Committee On Early Childhood and Behavioral Health
Measure, Appointment or Topic: SB702

Hello,

I am a former smoker that got hooked in high school on flavored tobacco products. Quitting was very hard and I think having flavored products only make it more likely that young people will pick up the habit. Banning flavored vape products is a common sense measure to protect our kids. There is no good reason to sell addictive, harmful products targeted at children that will leave them with financial and healthcare burdens in their life. Please support the bill to ban flavored vapes.

Thank you,

Kyle
