

Submitter: Shauna McKain-Storey

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3081

Many Oregonians, like me and others in my community, are trying to increase energy efficiency in their homes and businesses, whether to decrease costs which keep going up, or out of concern for preserving our energy supply and security or the environment. HB 3081, which would create a navigation program at the Oregon Dept. of Energy to actively help Oregonians trying to access federal, state, local, and utility energy efficiency incentives all in one place, seems like a great idea. Why not work to make the lives of everyday Oregonians a little easier? Please support this bill. Thank you.
