On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3362

I'm writing today to support HB 3362. Transit is a critical part of our state's approach to climate change, and the amtrak cascades is a critical backbone of our intercity transit network. With cascades hitting record ridership numbers last year, it's clear we need to find funding to support this popular service and this bill provides a clear revenue stream that would only modestly impact people who can afford a small additional tax.
