

Submitter: Martin Bassett  
On Behalf Of: My endocrinology patients who are diabetic  
Committee: House Committee On Behavioral Health and Health  
Care  
Measure, Appointment or Topic: HB2955

I am an endocrinologist practicing in Salem, Oregon. I highly support legislation that expands coverage of diabetic patients that are at risk for future health consequences from poor diabetes control or hypoglycemia. This change is very necessary to improve health outcomes in our patients. Thank you. Martin Bassett, MD, American Board of Endocrinology and Metabolism certified.
