

Submitter: J Carriveau

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB215

I want to see this amended to exclude this portion: requirement that there be a licensed repository for the disposal of high-level radioactive waste before a site certificate for a nuclear-fueled thermal power plant may be issued. We must consider the disposal portion of nuclear wastes as it is a part of having the repository in the first place. This is totally irresponsible and needs removed from this bill. We understand the need for the small nuclear plants if we are to allow ANY more servers to be placed in Oregon. They MUST be forced to supply ALL their own electrical needs. These servers are sucking out all our electricity, and this should never have been allowed. Please consider amending this bill.
