

Submitter: Kathleen Boylan

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB216

I'm writing in opposition to SB 216. It has been 45 years since passage of a ballot measure by the people of Oregon precluding construction of nuclear facilities until a safe mechanism for disposing of nuclear waste has been developed. There is still no safe storage facility for nuclear waste.

SMRs are extremely costly, take years to build, divest money from renewable energy and are not safe from fire and earthquakes.

Please don't put Oregonians in danger at the behest of greedy corporations. Do not advance SB 216

Respectfully
Kathleen Boylan
