

Submitter: Clair Klock
On Behalf Of:
Committee: Joint Committee On Transportation
Measure, Appointment or Topic: HB3453

Chair Gorsek and McLain and members of the committee,
We are Clair & Beverly Klock from Corbett, retired conservation resource specialist.
We urge you support of HB 3453. This will provide a viable alternative to vehicle traffic on freeways. Population will continue to increase to the point of not have space on the road for vehicles. We are already in a situation of stop and go traffic and long delays due to accidents on freeway. With traffic bumper to bumper often going 70 mi/hr., so need a safer alternative. And lastly - it will make a difference in greenhouse gas emissions.
Thanks you for your work and attention.
