

Submitter: Scott Killops

On Behalf Of:

Committee: House Committee On Climate, Energy, and  
Environment

Measure, Appointment or  
Topic: HB3172

I fully support House Bill 3172. Retrofitting homes and accessory structures with fire-resistant materials and designs is one of the most effective as well as cost effective ways we can reduce the impact of wildfire. The Wildfire Prepared Structure Grant program will ensure that Oregonians in vulnerable communities have access to the resources needed to accomplish this.
