

Submitter: Andrew Simrin

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or
Topic: HB3477

I support HB 3477 for further refining our goals around greenhouse gas emission reductions. Climate chaos is upon us and we even have an urgent need for net-negative GHG emission goals due to the globe's accelerating burning of fossil fuels and generation of other greenhouse gas emissions, causing rising average surface temperatures, which I would also support as an amendment.

Thank you.
