

Submitter: Judy Todd

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB215

Repealing this requirement for deposits of radioactive waste, for a period of time, or on behalf of consideration of site-certificates, is untenable and inappropriate. It goes against common sense, goes against the reality of good science, against planning in a responsible way both now, and for future deposits of radioactive waste, and against the citizenry it could expose. The rush to build and operate nuclear-fueled thermal power plants is undeniably a mis-guided direction.
