

Submitter: Mark Darienzo

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3681

Existing Oregon state requirements for permitting new transmission lines are sometimes complex or duplicative, hampering efforts to expand the electricity grid in response to increased demand. HB 3681 makes a number of changes to administrative regulations that are designed to speed the permitting process, while still ensuring proper oversight of environmental and other impacts.
