Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3609

Climate Scam Inc. strikes again. They greenwash corruption and cronyism with "climate" and the Oregon Demos just unintelligently suck it up because it says "climate."

What does this climatebabble even mean?????????: "Requires each electric company to develop a distributed power plant program for the procurement of grid services to be provided by distributed energy resources."

So a distributed powerplant has to procure grid services by distributed energy resources providers in order to distribute electricity resources in order to procure grid services provided by energy resource providers that were distributed by grid energy distributors who procured grid energy that was distributed by power plants that procured grid energy resources distributed by grid energy providers from power plants?

You people are dumb.
