

Submitter: Melissa Rowe Soll

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3681

Honorable House Committee,

As you know, climate change is disrupting economies, ecosystems and communities. Now is the time to assure that future energy needs are met with clean, green sources.

To utilize and expand solar, wind and other sustainable energy generation - and to meet rapidly growing demand - Oregon must streamline transmission line permitting and construction.

Thank you for your leadership at this critical time.
