Care

Measure, Appointment or
Topic: HB2029

We must end insurance clawbacks! I am a licensed professional counselor practicing for 11 years in Portland, Oregon. I am a small business owner and rely on providing healthcare where clients can use their insurance benefits. It's unconscionable that insurance corporations have an open checkbook and unlimited time to burden providers with audits without merit. The use of AI will only make audits more burdensome and there's little to no evidence of future boundaries for human auditing. Please provide these guardrails against insurance. Laurie Perdue MA LPC
