

Submitter: Monique Bochsler

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3477

To whom it may concern,

I firmly reject this bill. The current climate objectives are unrealistic, and tightening them further is illogical. Even if Oregon and the entire United States achieved zero emissions, it would have no significant effect on global temperatures by 2100. Major polluters like China, Russia, and India are unlikely to participate in this carbon-driven scheme. Oregonians are already struggling financially, and legislation like this only increases energy costs and jeopardizes grid stability. Oregon should not emulate California's missteps. I strongly encourage the committee to vote against this bill.
