

Submitter:	Marilyn Feldhaus
On Behalf Of:	myself
Committee:	House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic:	HB3681

I support HB 3681 because it is imperative that we make it easier to upgrade transmission systems in order to meet energy needs in the future,, not to mention in the present. I am an advocate for renewable energy sources and the use of these would be enhanced by having transmissions systems up and running in a timely manner. As it stand, 20 years is too long for permitting to take place. 3681 would address this issue while taking environmental concerns into account.
