

Submitter: Susan Haywood

On Behalf Of:

Committee: Joint Committee On Ways and Means Subcommittee On  
Natural Resources

Measure, Appointment or Topic: SB5521

There is no more important concern today than to cool the planet and protect biodiversity.

We are in a time of crises, especially with the federal forest lands being attacked by the current administration.

The Private Forest Accord will protect forests, water, and fish habitat!

Let's not revert to the Oregon Forest Practices Act that will do them all harm.

Please pass SB 5521 and protect the natural resources that draw people to Oregon.
