Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3453

Increasing rail capacity would be so helpful along the I-5 corridor. These days, the buses going from Albany to Portland are always packed full. More people would choose not to drive, and not to add to traffic in correspondance to increased times of travel and space capacity, which Adding rail would add to. Getting to Salem currently has very limited time options!

Thanks for working on this, it's important!
