

Submitter: Cara Kildall

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3681

To whom it may concern,

I am in support of HB 3681. Oregon needs to increase our ability to deliver energy for consumers and businesses. We have already seen the impacts of unreliable energy systems in Texas, and our current power grid will not be able to keep up with increasing demand due to AI technology, development, and a growing population. Oregon needs to streamline the process of improving and speeding transmission infrastructure, so that we are ahead of the game. This bill is an excellent way to achieve energy goals without compromising environmental protections or other impacts.
