Standards

Measure, Appointment or Topic: HB2548

the farmer has been struggling, for quite some time, many small farmers, have , had to give up their farms, as costly regulation, has made small farming, unprofitable, we are in a farmer shortage, we can feed this entire nation, without importing foods from other countries, but we must first restore the farmer, that is done, by removing bad regulations, and reducing, production cost to the farmer (reduced fuel prices, and fertilizer prices, HB2548, will have the opposite effect, non farmers, trying to tell farmers, how to conduct farming plans, possible unionizing (increased cost), my suggest, leave the farmer alone, he has hundreds of years of experience to draw upon, and short of newer technologies, crops are still mostly grown in soil, thank you
