

Submitter: Elaine Lavington

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB215

Research into nuclear technology has advanced a lot since the 1960s. Oregon State spun off NuScale Energy which has a reactor that is approved by the federal government. Technology has advanced so far that nuclear waste can be reused and recycled to make new rods. Reducing the need for disposal. This type of technology is better than wind and solar.

I support this bill
