

Submitter: Elaine Lavington

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB635

Oregon State University has, for many years been closely involved in the development of small modular reactors. There is no reason not to pass this legislation. Unless the intent of the bill is to show how wrong nuclear energy would be for Oregon, this legislation can only lead to a better understanding of how Oregon can take advantage of this reliable source of energy.

I urge the Committee to pass Senate Bill 635
