

Submitter: Elaine Lavington

On Behalf Of:

Committee: House Committee On Education

Measure, Appointment or Topic: HB3365

I strongly oppose the State Board of Education to include Climate Change in the classroom. Our children need to learn English, Math, Social Studies and Civics. Students should also be taught basic finance and how to care for themselves instead of being dependent on the government. Oregon rates 50th in education. This should tell the Department of Education that they are failing our students. Climate Change is not a necessity; it is a fraudulent fear created by some people that are getting very wealthy off of the Climate Change narrative.
