I'm a Montessori student because my parents decided to move away from Spokane to Eugene. In the area where we're moving Ridgeline Montessori seemed to be the best out of all the middle schools in the area and now I go to Ridgeline Montessori. Thanks to my new friends that I've made, and their help along the way, I am learning to adapt to this new environment. This is the second time I've moved so this is a little hard for me, yet I am gonna try to make the best of living in this new environment and have a good time being with new people. I especially like the electives at this school. So from my perspective I think that this school deserves the same amount of funding as any other school. Because they care so much about your learning and preparing for high school.
