

Submitter: Lisa Fugere

On Behalf Of:

Committee: House Committee On Early Childhood and Human Services

Measure, Appointment or Topic: HB3835

The government's duty is to protect its citizens and especially its most vulnerable; Children and the disabled. We need reform in DHS but not just taking away protections for children. We should be doing things to provide more protection, not less. I have been a foster parent for years and have seen first hand how damaging abuse is to children. It has life long effects. Please do not neglect the kids of our state by protecting them less. Please refine DHS and make protections better for our children and disabled citizens.

Thank you,
Lisa Fugere
