Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: HB2029

As a clinician over 25 years experience, I have watched the industry change to one that it makes it very difficult to navigate for providers. Especially. It's difficult to get credential. It's difficult to navigate, pay and reimbursement rates, what makes it even more difficult is the punitive actions from insurance companies which have occurred over time and have gotten worse. It's very difficult to navigate what is expected by the insurance companies as it seems to change extensively. I support this bill. I want you to support this bill. This will allow clinicians like myself to be informed about audits their criteria and place some standards for change and for exorbitant clawback of income from insurance companies which is financially devastating.
