

Submitter: Diane Luck

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or
Topic: HB3512

I strongly support HB3512 because everyone deserves to have access to pure and healthy drinking water that does not contain toxic chemicals. We know that toxic chemicals in our water can cause cancer and other serious health issues, so we can consider it an investment in our future to make sure we are drinking the best water possible.

Please do your part in making sure this bill passes.

Thank you in advance.

Sincerely,
Diane Luck
