Committee: House Committee On Education

Measure, Appointment or Topic: HB3444

Currently, the school district is withholding the maximum amount that they can from my children's in person, charter school only giving them an 80% funded budget. I am in favor of charters receiving a 95% funded budget because of how it will positively impact students and teachers. In a time when American funding is threatened in general, it is asking the impossible for charter schools to operate on such a limited budget. Increased funding will bring much needed resources to children.
