

Submitter: John Livingston

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or Topic: HB3512

How long do we have to wait until we require the plastics industry to remove harmful products that get into our bodies??????

There are less harmful product packing materials, but most are still made of non-biodegradable plastics. If we never require anything better than what they shove at us we will never get it. Please pass this bill to improve our health and that of our children and grandchildren.
