

Submitter: Evelyn Macpherson

On Behalf Of:

Committee: Senate Committee On Health Care

Measure, Appointment or Topic: SB1030

Please vote NO on SB 1030. This requirement to offer and provide vaccinations to patients in residential care facilities creates a government overreach by mandating medical care services to a population of people who are vulnerable to coercion, often not represented by family who can advocate for them, and medically fragile. with the patient. Personally, I had a sister (who is now passed on) who was medical fragile and was not able to advocate for herself. She was unable to inform or be informed of any medical procedures and their side effects. Mandates like this pose serious health risks to the individual. This is not progress overall. I urge you to vote no on this bill and consider all ramifications of these types of mandates. Without proper training and consent, patients could be given medications they have intolerance to or allergies or other drug interactions. This is unsafe and short sighted. Thank you.
