

Submitter: Teresa Mueller

On Behalf Of:

Committee: House Committee On Climate, Energy, and  
Environment

Measure, Appointment or Topic: HB3681

Outdated rules that delay and prevent new energy transmission creation in Oregon need to be rectified if we hope to avoid energy crises in this period of intensive energy use.

I commend you for putting forward HB 3336 - Grid Enhancing Technologies and HB 3628 - Oregon Electric Transmission Authority. HB 3681 segues nicely with those bills to keep our state charged and ready for the future.

Please support this bill.
