Environment

Measure, Appointment or Topic: HB3512

I have been using PTFE non-stick cookware and I was very happy with the performance. I have recently switched to ceramic nonstick and I am not really happy with its food release performance. I have read on their websites and several reviews that after a year or two their nonstick feature disappears and you need to replace them.

I would appreciate it if you could stop banning PTFE non-stick cookware and let people decide on their choice of cookware they want to use.
