Measure, Appointment or Topic: HB3365

Submitter: Eliana Arnold

Committee: House Committee On Education

Measure, Appointment or Topic: Support HB 3365

I strongly support HB 3365 as it would implement climate change and sustainability education. The reason this is important to me is that it not only protects our environment but also prepares students for the ever-changing workforce. Industries such as housing, clothing, energy, natural disaster risk reduction, and Artificial Intelligence will all benefit from sustainably educated workers and engineers as we create safer and more sustainable products. In order to create solutions, we need to have workers who understand the problem.

Thank you,
Eliana Arnold
