These people don't have a clue what's it's like to work sun up to sun down and barely get to see their families. At will employment for the most vulnerable and the most necessary has these workers scared to even speak up about working conditions. If families had the chance to have a board of representatives of people that actually looked like us and knew our struggle then you could see the potential in all these people. Even if you own a farm where you employed others to do the work while paying them pennies to the dollar then you're no better then modern slave masters. Create the board or see what happens when your workforce leaves you.
