

Submitter: Rainer Rivenburgh

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: HB2029

I support HB 2029 with vigor. I am an LPC Clinical Supervisor in the state of Oregon, and have been a therapist for 8 years. I strongly support a Providers Bill of Rights in case of an audit. In what other field of work can a party arbitrarily decide to claw back thousands of dollars, months or even years after the services have been rendered? That's like if I decided I was entitled to a 100% refund from paying my roofer, plumber, or general contractor, because there was a typo on the invoice.
