Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB2851

Given what the Federal Government is currently doing with its permissive actions regarding "terrorism"; we should not be expanding laws to increase federal penalties. We have just witnessed this week a legal resident in New York be abducted by police for expressing opinions that some have mislabeled as 'pro-terrorists". If we continue to expand on a already poorly written law, we are not helping anyone. We have laws that prohibit criminal acts. We do not need to have laws that provide the federal government with more ways to target people. Oppose this measure. It is the least you can do.
