

Submitter: Kathleen Boylan

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB215

I strongly oppose SB 215. It has been 45 years since the passage of 1980 bill to stop building nuclear reactors in Oregon till there is safe storage for nuclear waste. There is still no safe storage. Small nuclear reactors are too expensive, take too long to build, and not safe from fire and earthquake

Do not risk the health and well being of Oregonians to satisfy corporate greed.

Respectfully
Kathleen Boylan
