

Submitter: David Wall
On Behalf Of: Mr Oregon SUPPORTS HB 3246
Committee: House Committee On Economic Development, Small
Business, and Trade
Measure, Appointment or Topic: HB3246

I SUPPORT [HB 3246 -3].

Looks like ZERO WASTE has changed its' name to "industrial symbiosis." Can my heart stand the strain.

"Waste not, Want not" is the premise of [HB 3246 -3].

[HB 3246 -3] will be a revolutionary experiment benefiting everyone if done correctly. Just review the successes of the "Subaru Automotive Factories."

A serious focus will be on "Clean Water." Oregonian Publically Owned Treatment Works (POTW) will face increasingly tough National Pollution Discharge Elimination System (NPDES) regulations for discharge into Oregonian Rivers. Currently, the discharges are "warming" up the waters and the Salmonid fishes have registered their disapproval.

Reclaimed Water Projects and Percolation Ponds will be very useful for recharging aquifers and for irrigation.

David S. Wall
Mr. Oregon Concurs.
