Measure, Appointment or Topic: HB3039

Hello,

I am writing to share that these learning opportunities are what made learning feasible for me, so that I could catch with fellow classmates due to being a learner who needed more support and time. Studies show the impact of these learning opportunities please work to keep them funded.

It's becoming impossible to support these learning opportunities outside of state funding. There simply is not enough private donors to support the students in need of barrier free access.
