Environment

Measure, Appointment or  
Topic: HB3512

March 13, 2025

RE: HB 3512 – Reduce PFAs - Support

Members of the House Committee on Climate, Energy and the Environment.

PFAS are a class of toxic chemicals widely used in consumer products and have been linked to cancer, obesity, diabetes, birth complications and many other diseases.

PFAS are known to be “forever chemicals” which do not naturally decay and therefore will contaminate our environment for the foreseeable future.

For these reasons I strongly urge the Committee to wholeheartedly support HB 3512.  
Thank you.
