

House Committee on Judiciary

RE: HB 3075

I now understand why our educational system is failing. Our schools have failed our kids on how to read founding state and U.S. Constitution and Bill of Rights which are THE founding documents of our great Republic. This bill proves that.

HB 3075 will be found unconstitutional and parts of it have already been ruled unconstitutional in other cases. Yet you continue to ignore the constitution and the case law that has resulted in other jurisdictions like California. You cannot have a "permit" process for a constitutionally protected right like the 2nd Amendment. Even better why require a permit, which requires a background check, when you already have to do a background check in order to purchase a firearm? So, our already overworked BCI Unit can do the same work twice?

You cannot have a person that is being charged with a crime (because they own a magazine over 10 rounds) have the burden of proof placed on them that they purchased it before 2022. The burden of proof WILL always remain on the prosecution. Pretty sure I read this somewhere before. How many of you still have the receipt for the car they purchased 5 years ago? (a car is way more expensive than any firearm magazine). Nobody in their right mind would write legislation this flawed and expect it to pass any form of constitutional scrutiny. If you want to prove just how incompetent the Oregon Legislature is then you are on the right track if you pass this.

You cannot limit redress to this unconstitutional bill to ONE court in Multnomah County. But I guess that is the mess that controls the entire state. Nobody has equal rights under the law with this methodology. I guess if you want to steer the desired outcome of a court ruling, this might be a way to do it.

You have sections in this bill that make DEI reference statements which will put any federal funding you hope to receive in jeopardy at this moment. But, then again, this is a taxpayer funded mess that the taxpayers will have to pay to fight. Speaking of funding, I cannot find any reference on how local jurisdictions are going to fund any of this process! But the purchaser will have to pay for a background investigation twice, and pay for a new permit they don't need according to the U.S. 2nd Amendment.

Liberty and Justice for all?
