

Submitter: Bradly Mabie

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

This is just an expansion of HB114 which puts more restrictions and hardships for minority people to gain the ability to defend themselves. Also passing 3075 will null HB114 and will be a waste of millions of tax payers money that have been used to fight back and forth over the legality of the previous bill. I don't like my money wasted.

It also makes criminals out of people for previously legal stuff that they owned. This is just to further punish the legal gun owners and does nothing to crack down on those that actually are actively breaking laws that are hurting other people. The wording and the basis of this bill is filled and pushed with emotion and not logic. If passed then nothing happens all the anti gun group is going to do is expand more restrictions and still nothing quantitatively is going to happen in any good way.

I am speaking as a gun owner who has had my life saved by just carrying a gun. I am safer being able to carry what I wish and can match the criminal elements of this state.
